...om, this is what Ixxxxxxxxxx spoke t
available files on these copyrights exa mine
pages with handwritting. I presume all the r.
actual applications are. I think it best that w.
it is the handwriting I am interested in or why. If there is any problem, and I
not anticipate one, a Mr. Mark Lillis, chief of the book division, has been very
hekpful to me and would probably assist anyone who phoned him and asked for his
help on my behalf. While I also expect nothing of exceptional interest in the files,
I would be interested in anything of this sort that might be there and would want
such information Xeroxed also. When you get it, I will pick it up. Many thanks.

HW
